**DETAILED ACTION**

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dillon '773.

Dillon teaches a method for washing and chilling eviscerated fowl which is structurally similar to the Applicant's process for chilling and aging front portions of poultry carcasses. Dillon teaches conducting fecal inspections of the portions of the carcass, pre-chilling the portions in water and then chilling and aging the portions of the carcass. However, Dillon does not specifically mention separating the eviscerated poultry carcasses into front portions and back portions. Regarding claim 1, it is well-known in the slaughtering art to cut the carcass in such a way as to separate the front and back portions in order to expose the interior of the carcass for cleaning. As for claim 3, Dillon teaches the use of water for chilling and aging the carcass portions. In regards to claim 4, the carcass portions are continuously chilled through a chiller. Regarding the remaining claims, additional fecal inspections occur and chlorinated water rinsing.
